THE NO-CODE TOOLKIT

Webflow - This is our go-to for building web applications and websites. You can build without code and extract the code at any time.

Bubble - We love this tool for building and hosting web and mobile apps without engineering power.

Zapier - Zappier allows you to connect no-code tools that lack integrations and automate workflows. Think of it like an API for everything.

Airtable - This is a powerful spreadsheet tool that also acts as a database.

MemberStack - Create a paid membership area for your community.

Glide - Easy way to build apps from spreadsheets.

DashDash - A spreadsheet that does much more.

Carrd - Quick and easy landing pages and one-page websites.

Parabola - Automate your routine data tasks and automate workflows.
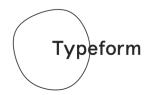

Pipedrive - Great CRM for sales teams. This is useful for when you have a small team of sales reps.

Jetboost - Real-time search, dynamic filtering and other great plug and play features for Webflow.

Phantom Buster - Great way to automate the extraction of public data to generate leads and growth.

Typeform - Very simple tool to build online forms, quizzes and surveys. It will send the answers to Google sheet or directly to your CRM.

Sketch - Easy to learn design tool.

STARTER PERKS KIT

Notion is an application that provides components such as databases, kanban boards, wikis, calendars and reminders. Users can connect these components to create their own systems for knowledge management, note taking, data management, project management, among others.

$1,000
